PROFILE

Senior DevOps and Platform Engineer with 15+ years in infrastructure, focused on Amazon Web Services (AWS) multi-account platforms, hybrid networking, Kubernetes (Amazon EKS), Infrastructure as Code (IaC) and Site Reliability Engineering (SRE). I lead a team of 8 DevOps engineers supporting 8 product teams for US-based clients and stay hands-on in architecture and production. I have taken teams from 1 deploy per week to 2-6 per day and operated infrastructure serving 16M+ users in regulated banking.

SKILLS

- **Cloud:** Amazon Web Services (AWS) (primary), Google Cloud Platform (GCP)
- **Platform Engineering & SRE:** Platform Engineering, Site Reliability Engineering (SRE), GitOps, incident management, observability
- **Infrastructure as Code (IaC):** Terraform, Ansible, CloudFormation
- **AI-Assisted Engineering:** Claude Code (Terraform development and refactoring, architecture design, CI/CD pipelines, troubleshooting)
- **CI/CD:** GitLab CI/CD, AWS CodePipeline, AWS CodeBuild, GitHub Actions, Argo CD
- **Containers & Orchestration:** Kubernetes (Amazon EKS), Helm, Istio, Amazon ECS, Docker
- **Networking:** Direct Connect, Transit Gateway, PrivateLink, Route 53 Resolver, VPC design, BGP, Nginx, TLS termination
- **Observability:** Datadog, CloudWatch, New Relic, Dynatrace
- **Security:** AWS IAM, AWS WAFv2, Secrets Manager, SSM Parameter Store, Checkov, SonarQube
- **Databases & Streaming:** RDS, Aurora (PostgreSQL, MySQL), MongoDB, Kafka, Amazon MSK
- **Scripting:** Bash, Python
- **Leadership:** Team management, mentoring, technical consulting, cross-functional influence

PROFESSIONAL EXPERIENCE

Senior DevOps Engineer | BairesDev | Mar 2023 - Present

- Lead a team of 8 DevOps engineers supporting 8 product teams for US SaaS and fintech clients.
- Designed hybrid AWS networking over Direct Connect (DX Gateway, Transit Gateway) with a centralized PrivateLink endpoint VPC, Route 53 Resolver and conditional DNS forwarding for partner connectivity.
- Built multi-account Amazon Web Services (AWS) environments with reusable Terraform modules across dozens of accounts, enabling self-service provisioning.
- Standardized GitLab CI/CD across engineering teams: 1 deploy/week to 2-6/day (10-30x).
- Led the migration from monolith to microservices on Amazon EKS and ECS.
- Hardened public-facing services with AWS WAFv2 and least-privilege IAM.
- Own the production lifecycle with Site Reliability Engineering (SRE) practices: Datadog/CloudWatch observability, incident response, RCA and post-mortems.

DevOps Engineer | BairesDev | Feb 2022 - Mar 2023

- Set up GitOps deployments to Amazon EKS with Argo CD and reusable Terraform modules.
- Led a DevOps team for a high-security US client (May-Jul 2022), standardizing Terraform and Ansible provisioning across Windows and Linux.
- Built GitLab CI and AWS CodePipeline pipelines that automated build, test and deploy.
- Use Claude Code daily for Terraform module creation and refactoring, AWS architecture design, GitLab CI/CD pipeline development and production troubleshooting.
- Ran highly available RDS and Aurora (PostgreSQL/MySQL) clusters with Multi-AZ automated failover.

SRE Analyst | Banco Inter | Sep 2021 - Feb 2022

- Operated production AWS for one of Brazil's largest digital banks (16M+ users) across VPC, EKS, ECS, API Gateway, RDS, Lambda and MSK.
- Built GitLab pipelines with integrated code quality and security scanning for a regulated SDLC.
- Implemented monitoring, logging and alerting that reduced on-call toil.

Cloud Architect | KXC Tecnologia | Jun 2020 - Sep 2021

- Architected AWS solutions with Terraform and AWS CI/CD tools (CodePipeline, CodeDeploy) for enterprise clients.
- Automated deployments with AWS CodePipeline, GitHub and GitLab, replacing manual releases.
- Led large-scale migrations of legacy workloads to AWS.

Technical Lead | Gtek Soluções Tecnológicas | Sep 2017 - Jun 2019

- Led a technical team, owning incident management and on-premises virtualization projects.
- Architected and delivered network infrastructure projects for enterprise clients.

Technical Lead | Intranetworks | Sep 2014 - Aug 2017

- Promoted from IT Analyst to Technical Lead within a year; led team and incident management.
- Designed and delivered data center, network and virtualization infrastructure projects.

EDUCATION

Master's Degree in Big Data and Data Intelligence | INSA Barcelona | 2019 - 2020
Bachelor's Degree in Computer Infrastructure and Networks | Senac RS | 2013 - 2017

CERTIFICATIONS

- AWS Certified Advanced Networking - Specialty (2025 - 2028)
- AWS Certified DevOps Engineer - Professional (2024 - 2027)
- AWS Certified Developer - Associate (2023 - 2027)
- AWS Certified Cloud Practitioner (2020 - 2027)
- GCP Professional Cloud Developer (2025 - 2027)
- GCP Professional Cloud Architect (2024 - 2026)
- GitLab Certified Associate (2021)
